

ARE YOU REPLACING YOUR STERIS SYSTEM 1[®] WITH A STERILIZER?

	STERRAD [®] NX [®] SYSTEM	STERIS [®] SYSTEM 1E [™]
Cleared as a sterilizer	✓	X
Cleared for processing a wide variety of critical devices	✓	X
Provides sterility assurance	✓	X
Has a Biological Indicator (BI) to monitor the sterilization process ¹	✓	X
Devices are dry and packaged to maintain sterility	✓	X

The STERIS[®] SYSTEM 1E[™] is not a sterilizer and cannot meet your critical device processing needs.² The STERRAD[®] NX[®] SYSTEM is the clear choice for processing the critical devices you depend on while maintaining sterility assurance in your OR.

Upgrade to the STERRAD® NX® System for the sterility assurance that your patients deserve and the productivity that you need.

The STERIS® SYSTEM 1E™ does not provide the same processing capabilities as the STERIS® SYSTEM 1®. The SS1E is a liquid chemical sterilant processing system, which the FDA recommends only for critical devices that are heat-sensitive and incompatible with other sterilization methods such as steam and gas/vapor/plasma low-temperature processes.³

Sterilize with Confidence

- The STERRAD® NX® System delivers a Sterility Assurance Level (SAL) of 10^{-6} as required for the clearance of sterilizers
- The STERRAD® CYCLESURE® 24 Biological Indicator (BI) provides evidence of proper sterilization conditions as recommended by AAMI, AORN and the CDC
- Gas plasma low-temperature sterilization conveys a greater sterility assurance than liquid chemical sterilant processing

Sterilize More in Less Time

- Sterilize two instrument sets in one 28-minute cycle
- Sterilize a wide range of heat-sensitive and heat-stable critical devices
- Terminally sterilized devices maintain sterility for immediate or later use

Upgrading Has Never Been Easier

Contact ASP for trade-in options on your SS1 or SS1E and for the latest financing alternatives.

The deadline to stop using your SS1 is fast approaching. Call ASP at 1-888-783-7723, visit www.aspjj.com/alternatives or contact your local ASP representative for more information about upgrading to the STERRAD® NX® System.
